### NORTH ROUTE

# **SCOTTS MILLS**

Established in 1843, Scotts Mills owes its name to Adam Scotts, an early settler who arrived in the area in 1819 and erected both a lumber mill and a distillery. This lock holds significant historical importance as one of the oldest within the waterway system, being the sole surviving limestone lock from the original construction phase.

**Recommended restaurant:** Dockers Fish & Chips.

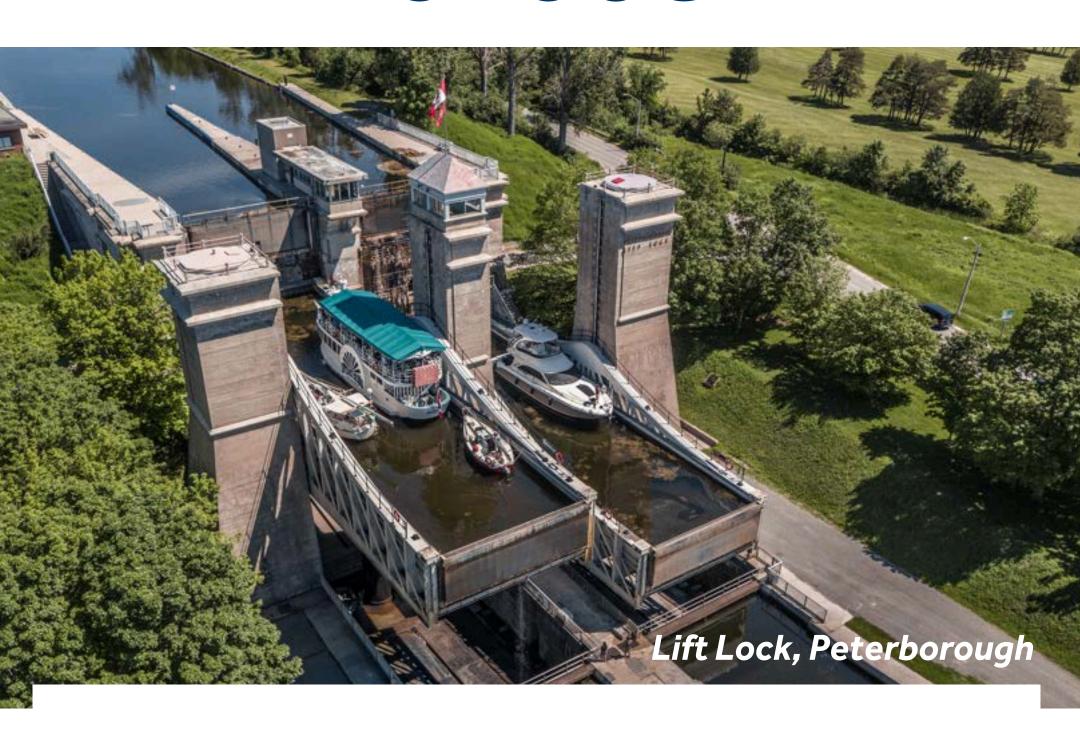

**Amenities:** Convenience store and McKnights gift shop.

**Farmers Market:** Saturdays, parking lot of the Memorial Centre.

### **NASSAU MILLS**

# PETERBOROUGH

Peterborough, founded in 1820, offers a range of services and shops. The city quickly became a busy spot for social and business activities along the Trent River and gained fame for its handmade canoes, recognized worldwide. For over 25 years, The Canadian Canoe Museum has preserved the world's largest and most significant collection of canoes, kayaks, and paddled watercraft. With more than 600 vessels, the museum offers a fascinating glimpse into the history, culture, and craftsmanship of water travel. Now housed in a stunning new waterfront location, this one-of-a-kind museum brings Canada's rich paddling heritage to life. Rent a canoe or experience a group paddle on a voyager canoe – pre book your spot for the summer season. The city also has numerous historic sites, art galleries, parks and other musuems. If you're in Peterborough on a Wednesday or Saturday during the summer, don't miss Peterborough Musicfest - Canada's longest-running free concert series, featuring open-air performances and easily accessible by boat.

One of the most iconic features of the Trent-Severn Waterway is the Peterborough Lift Lock – Lock 21. This engineering marvel, completed in 1904, remains one of the tallest hydraulic lift locks in the world, with a lift of 19.8 meters (65 feet). Ascending or descending this lock is nothing short of spectacular, offering panoramic views of the surrounding landscape. The lock operates on a balance system: water is let into the upper chamber, a connecting valve is opened, and the heavier chamber automatically descends, forcing the lower chamber to begin a new cycle. In 2024 alone, 4,300 vessels were locked through, proving that this National Historic Site is a must-see attraction for boaters and land-based visitors alike.

The Trent-Severn Waterway also offers unique overnight stays that make any summer trip unforgettable. Roofed accommodations like the family-friendly oTENTik at Duro Lock 24 (north of Peterborough) and the teardrop-shaped Ôasis pods at Locks 9 and 10 (to the south) are perfect for kids and come with campfire and canoe access. These popular spots book up quickly in summer - reserve ahead at parks.canada.ca or parks.canada.ca/oasis.

According to the legend, Lovesick Lake earned its name from a tragic tale. It's said that Polly, the daughter of Chief Jack Cow, suffered from unrequited love. The wall was originally commissioned by the Boyd family, who were well known across Canada for their logging and Beefalo production. The Boyd family were also instrumental in the building of the Trent Severn Waterway, Bobcaygeon was the first lock built along the canal almost 2 centuries ago in 1833.
