Most of the locks of this region are electric and user-operated, except for the lock linking the Canal de Garonne and the Baise River and the last double-lock of the Baise River which are operated by lock keeper. Set a crew member ashore before the lock so they can walk to the controls. Only enter the lock when a single green traffic light is showing. The crew member should always stay next to the control panel while the lock is in operation, ready to push the red stop button in case of emergencies. Please refer to the onboard Boat and Navigation Manual for more information about how to operate and pass through locks.

# OPENING HOURS

# MOORING

On the Canal de Garonne, moorings are plentiful and you are free to moor anywhere where you can safely access the bank, using mooring pins provided on board. Although please refer to your waterways map for exact locations. Exceptions are: if there is a sign indicating to the contrary, if you are on a bend or if you are less than 50m from a structure such as a lock or a bridge. You are advised to only moor in ports or private marinas on the Baise River as most banks are private. Most towns and villages have mooring bollards or rings to tie up to, for a charge of between €10-€20 per night. Usually they'll have water refill points and electric hook-up facilities (not available on all boats). Do not moor at waiting pontoons on either side of a lock (unless you are waiting for the lock).

# WATER

You will need to fill up your water tank once or twice during the course of a week. Water points are available at all Le Boat bases en-route, for free. Otherwise, there are several ports/marinas that will allow you to fill your tank for a charge of €2-€5. In some marinas, you'll need to purchase tokens from the port office.
